

July 10, 2026

Evergreen Internet is eager to announce we will be starting construction to install fiber optic communications throughout North and South Twin Lakes!

Who is Evergreen Internet? Lehigh Valley Cooperative Telephone Association based in Lehigh, Iowa, and Webster-Calhoun Cooperative Telephone Association based in Gowrie, Iowa, are neighboring companies in Webster County and have an extensive history and experience in providing reliable Internet, Wi-Fi, TV and phone services locally. We are thrilled to create this partnership to support the residents of Twin Lakes with a system built to last and backed by people who take pride in maintaining it.

Who is doing the construction? Lehigh Valley and Webster-Calhoun both have a long history with the contractor, Central Cable Contractors from Waupun, WI. They have done all our past fiber construction and we are confident they will do excellent work particularly with the challenge of a densely developed shoreline. We are also working with Vantage Point Solutions from Mitchell, SD for engineering and support.

How do we get started? Contact us to schedule a site survey. Initially we request property owners to provide authorization and permission to place fiber underneath your property to your home or business. The site survey allows us to talk with you directly and determine how the fiber will cross your property and connect to your buildings. There is no charge for a fiber drop during construction and no obligation for taking our service.

Don't miss this free opportunity to connect to our 100% fiber-to-the-premise network. Fiber service is valued by homeowners because it provides fast, reliable Internet for work-from-home needs, streaming, Wi-Fi, smart home devices, security systems, telehealth, and everyday online use. It can also make a property more attractive to future buyers as dependable high-speed Internet continues to be an important home feature. If pre-authorization is

not given during the initial installation process, construction charges will apply for connecting later.

What services will Evergreen Internet offer? Watch for more information about available products and services (local telephone, Internet access options with over a Gig - Gigabit per second - in upload AND download speeds, Wi-Fi, and streaming TV). Although we expect construction to begin in September we appreciate your patience throughout the construction and testing process. We estimate service will begin in the spring of 2027. Visit our website at www.evergreenfiberinternet.com for more information.

We look forward to bringing Twin Lakes the same reliable, high-quality service we provide to over 25 small rural communities. If you have questions, concerns, or want to sign up for a site visit, please contact our local office Monday through Friday from 8:00 a.m. to 4:30 p.m. at 515-352-3000—you'll speak directly with a local person.

Sincerely,

Evergreen Internet
